PROFESSIONAL OBJECTIVE

Software Developer / Software Engineering Intern — Seeking junior or internship opportunities in Full Stack & Backend Web Development, focused on Python/Django, RESTful APIs, relational databases, and modern web architectures.

PROFESSIONAL SUMMARY

Undergraduate in Information Systems at Instituto Federal Catarinense (IFC) with an integrated technical diploma in Internet Computing. Hands-on experience developing full-stack web applications, scalable REST APIs with Python/Django, and interactive front-ends with Vue.js and React. Experienced in software architecture, process modeling (BPMN), database design (PostgreSQL/MySQL), automated testing, and security hardening (OWASP, CSP, rate limiting). Fluent in technical English with strong team collaboration, problem-solving, and continuous learning mindset.

EDUCATION

B.S. in Information Systems (Bacharelado em Sistemas de Informação)

Instituto Federal Catarinense (IFC – Campus Araquari) | 2026 – 2029 (Expected) | Morning schedule (8:20 AM - 12:00 PM)

Core focus: Software Engineering, Data Structures, Relational Databases, Agile Methodologies, and Process Modeling (BPMN).

Technical Diploma in Internet Computing (Técnico em Informática para Internet)

Instituto Federal Catarinense (IFC – Campus Araquari) | Completed

Integrated technical program covering programming logic, algorithms, Web Standards (HTML5/CSS3), JavaScript, and Relational Databases.

FEATURED PROJECTS & ACHIEVEMENTS

Hackathon Fábrica de Software 2k26 (Awarded · 24-Hour Non-stop Marathon)

Developed an AI-powered educational platform in Python/Django in an intensive 24-hour sprint to support teachers in creating personalized learning materials and detecting early neurodivergent indicators (ASD and ADHD) in public elementary students.

Production-Ready Portfolio & REST API (OpenAPI 3.0 / Swagger UI)

Built a high-security full-stack Django application on PostgreSQL with WhiteNoise, automated CI/CD pipeline (41 automated tests on GitHub Actions), custom rate limiting, CSP/HSTS headers, PWA support, and interactive Swagger documentation.

Santory Pizzaria — Integrated POS & Order Management System

Engineered a decoupled restaurant web platform: reactive SPA in Vue 3 (Vite) on Vercel and Django REST backend on Render with automated ingredient inventory control and multi-tier access authentication.

TECHNICAL SKILLS & LANGUAGES

Languages & Back-end: Python, Django, Django REST Framework, RESTful APIs, OpenAPI/Swagger, Gunicorn.
Front-end & UI/UX: JavaScript (ES6+), Vue 3, Vite, Pinia, React, HTML5, CSS3, Responsive Design, Figma.
Databases & DevOps: PostgreSQL, MySQL, SQLite, Git, GitHub Actions (CI/CD), PWA, WhiteNoise, Vercel, Render.
Languages: Portuguese (Native) | English (Intermediate / Professional Working Proficiency — 4 years at KNN Idiomas).
